

# CloudSahayak

Empowering Nonprofits with Cloud & DevOps Excellence

# Presentation Overview

## **1** The Cloud & DevOps Challenge

Why traditional IT approaches fail to meet the unique needs of NGOs of all sizes.

## **2** Introducing CloudSahayak

A purpose-built solution helping nonprofits simplify cloud operations and scale impact.

## **3** Real Impact Stories

How NGOs reduced costs, improved uptime, and accelerated programs.

## **4** Your Transformation Journey

Next steps to simplify your infrastructure and focus on your mission.

# The Problem We Solve

## Escalating Cloud Costs

Budgets strained by 20–30% annual cloud spend growth, with no clear cost control mechanisms.

## Lack of Cloud Visibility & Governance

No real-time insights into cloud usage and performance.

## Teams Stuck in Firefighting Mode

60% of tech time goes into fixing infra, leaving little for innovation.

## Scaling Bottlenecks

Inability to handle sudden spikes in traffic or workloads without system failures or costly upgrades.

## Compliance & Data Protection Risks

Evolving laws like DPDP create audit risks and funding vulnerabilities.

## Disaster Recovery Gaps

No tested backup and recovery plans, risking donor and program data during failures.

## Legacy Systems Blocking Growth

Old infra can't handle modern program needs or scale with you.

## Siloed Tools & Processes

Disjointed systems and tools create inefficiencies and hinder collaboration.

# Enter CloudSahayak

A purpose-built offering by Dhwani RIS designed specifically for the development sector

## Cloud-Native Design

Infrastructure designed to scale with your programs and beneficiaries.

## DevOps Automation

Faster deployments, fewer errors, and minimal downtime for your systems.

## Security & Compliance First

Stay audit-ready & protect sensitive data

## Cost Optimization & Visibility

Reduce cloud spend by up to 40% with intelligent monitoring and governance.

## End-to-End Support

We don't just advise, we implement, monitor, and manage for you.

## Nonprofit Domain Expertise

Built on Dhwani's proven success with mGrant, mForm, DataSights, and 30+ NGOs.

# Our Service Offerings

## Cloud Infrastructure

- ❖ Multi-cloud (AWS, Azure, GCP) design and setup
- ❖ Multi-account & multi-region management for scale and resilience
- ❖ Seamless cloud migration from legacy systems
- ❖ Cluster design, deployment, and scaling workloads.

## Security, Privacy & Compliance

- ❖ Data protection aligned with DPDP, GDPR for nonprofits
- ❖ IAM with role-based access
- ❖ VPC hardening, encryption, and security monitoring tools
- ❖ Audit-ready infrastructure for donor and grant compliance

## DevOps & Automation

- ❖ CI/CD pipelines for faster, zero-downtime deployments
- ❖ Infrastructure as Code (Terraform, CloudFormation, CDK) for consistency
- ❖ Automated patch management and configuration drift prevention

## Cloud Cost Optimization & Governance

- ❖ Right-sizing workloads to cut costs by 30–40%
- ❖ Real-time spend dashboards and alerts for resource tracking
- ❖ Automated idle resource cleanup and storage tiering

Services are aligned with industry best practices to ensure secure, scalable, and cost-efficient cloud operations.

# Our Service Offerings

## Resilient Backup & Recovery

- ❖ Fully managed backup strategies for critical nonprofit data
- ❖ Tested recovery plans for business continuity

## Monitoring, Analytics & Insights

- ❖ 24/7 cloud monitoring with automated alerts
- ❖ Customized dashboards for donors, boards, and operational teams
- ❖ Predictive analytics to plan infrastructure scale and usage

## NGO-Focused Consulting & Support

- ❖ Dedicated cloud engineers with sector expertise
- ❖ Hands-on implementation and continuous optimization
- ❖ Training for in-house teams to manage modern cloud systems

## Streamlined GitOps Delivery

- ❖ Declarative infrastructure management with Git as a single source of truth
- ❖ Secure and automated application delivery pipelines
- ❖ Rollbacks and audit trails for every change

Services are aligned with industry best practices to ensure secure, scalable, and cost-efficient cloud operations.

# Cloud Cost Optimization | Case Example

TMF, TRIF, Jan Sahas, Nasscom (Thinqbator)

30-40%

AWS Cost Reduction

Monthly savings achieved

70%

Resource Efficiency

Improved utilization rates

**Key Implementations:** Right-sizing, idle resource automation, intelligent storage storage tiering, Autoscaling Configuration, Tagging & Resource Grouping, Cost Monitoring & Alerting Dashboards

# Infrastructure Modernization | Case Example

**PRADAN, Sattva, Nasscom (Thinqbator), TRIF:** Complete modernization with Kubernetes (K8s) & CI/CD, 3-Tier Architecture, and migration to AWS CodeBuild & App Runner.

## Deployment Time

Reduction in release cycles

## Error Reduction

Fewer production issues

## Uptime Achieved

**Outcome:** Dramatically improved resilience and scalability for mission-critical nonprofit applications.

# Security & Compliance | Case Example

Jan Sahas, TMF, WRI, and HUF: Audit-ready infrastructure with enhanced security and compliance frameworks

1

- ❑ IAM Best Practices
- ❑ Role-based access control implementation
- ❑ Automated key rotation & secrets management

2

- ❑ VPC Hardening
- ❑ Network security and isolation
- ❑ Network security, isolation & intrusion detection (IDS/IPS)
- ❑ Encryption in transit (TLS) and at rest (KMS) across workloads

3

- ❑ DPDP Roadmap
- ❑ Compliance strategy for PII handling
- ❑ Continuous compliance monitoring
- ❑ Security incident response plan & disaster recovery alignment

**Result:** 90% reduction in vulnerabilities with full audit compliance and improved infrastructure security for sensitive nonprofit workloads.

# Our Team & Credentials

## AWS Solutions Architect

Certified AWS Solutions Architects in our team bring deep expertise in building secure, scalable, and cost-efficient cloud environments tailored to your needs.

## AWS Certified DevOps

Our engineers hold professional-level AWS DevOps certifications, ensuring expert knowledge of continuous integration and delivery practices.

## Security Specialists

Team members with AWS Certified Security – Specialty credentials bring deep expertise in cloud security architecture and implementation.

## Proven Experience

We've successfully managed 40+ production workloads across NGO, enterprise, and government sectors with expertise in Linux systems and cloud-native transformation.

# How We Work?

# What Our Partners Say

Real results from development sector organizations

1

## Cost Reduction Success

"CloudSahayak helped us reduce our cloud costs by 35% while improving uptime to 99.9%. Their expertise in optimizing resources for NGOs is unmatched."

2

## Seamless Collaboration

"Their team feels like an extension of ours — responsive, knowledgeable, and deeply understanding of our mission-critical requirements."

3

## Security Confidence

"We finally feel confident about our security posture thanks to CloudSahayak. Their compliance expertise has been invaluable for our donor requirements."

# We have worked with **diverse sets of client**

# Thank you

**Ready to transform your infrastructure?**

Let's build something amazing together.
